TIPS

1. Cut flowers in evening of the day before or morning of entering, placing stems immediately into lukewarm, clean water. Can briefly submerge entire flower later to cleanse off any dust, bugs, etc.
2. If keeping overnight before entering, store in a cool, dark place.
3. Re-cut stem at an angle before putting into display container. Be sure to remove enough lower leaves so that leaves will NOT be submerged in container water.
4. Remove any "dead headed flowers" and remove any imperfect leaves.
5. Optional: plastic wrap may be placed over opening to hold flower(s) upright.
